Ontario, Canada (Remote) - Canadian, Czech & British citizen

Senior Software Engineer with 7 years of experience building high-availability backend systems in the fintech industry using Python, C++, Kubernetes, and Google Cloud Platform.

Work Experience

Senior Software Engineer Trading Systems team	Oanda (Canada) Corporation ULC Toronto, ON, Canada (Remote)	2019 - Present
- Built and maintained backend services for the trade execution engine of a global FX trading platform serving around 19K monthly active users and processing approx. 1.4M client orders per month. - Owned the full software development lifecycle for distributed backend services in a regulated fintech environment, from requirements through deployment and production support. - Migrated a production service from Python 2.7/Solaris to Python 3/RHEL, reducing technical debt and enabling platform modernization. - Designed and delivered a new account creation service, coordinating integration across multiple engineering teams. - Developed and maintained MetaTrader integrations through backend services and plugins connecting external trading platforms to proprietary execution systems. - Participated in a 24/7 on-call rotation (every 4-6 weeks), leading incident response and post-incident reviews for high-severity production issues. - Decommissioned multiple legacy Solaris services through coordinated cross-team migrations with no customer impact.		
Software Developer Software Development team	Gepro s.r.o. Prague, Czech Republic	2017 - 2019
- Enhanced and maintained a proprietary C++ geospatial library, implementing new functionality and improving existing components. - Built custom Mapnik plugins enabling users to create and edit spatial data within the application. - Extended the open-source Mapnik rendering library to support visualization of geospatial data via pie chart overlays.		

Education

- | | |
|--|-------------|
| • MSc. (Ing.) Geomatics , Czech Technical University in Prague. | 2019 |
| • BSc. (Bc.) Geodesy, Cartography and Geoinformatics , Czech Technical University in Prague | 2017 |

Skills

- Languages:** Python, C++
- Cloud & Infrastructure:** GCP, GKE, Kubernetes, Docker, Terraform, Helm
- Data & Messaging:** PostgreSQL, DB2, Cassandra, Kafka, ZeroMQ, Protobuf, ZooKeeper
- Observability & Incident Management:** Prometheus, Grafana, Splunk, PagerDuty, JiraOps
- CI/CD & Version Control:** ArgoCD, CircleCI, GoCD, Git (Bitbucket, GitHub)
- Systems:** Linux (RHEL); prior experience porting/decommissioning Solaris services
- API & Trading:** MetaTrader 4, REST
- AI Tools:** Claude, Cursor, Gemini Code Assist
